### OBJECTIVE

A dedicated, experienced developer with more than 4 years of both web and mobile application development. This experience combined with an aptitude for modern programming languages which are listed below my "skills". Adding values with purpose driven mind to ensure the satisfaction of my clients/employer as priority. Hardworking and thorough with passion for innovative, highly effective team. I am also open to assessment test prior to any employment or contract.

### EXPERIENCE

#### PU&sons

Computer software/hardware engineer

2010 -

2016

A professional computer system technician, with over 10 years experienced in all kinds of gadgets maintenance both software and hardware.

Managed program errors with analytical approach focused on troubleshooting, diagnostic and resolving each problem.

#### Freelance

Fullstack developer

2017 -

2022

A developer with many years of experience. An enthusiast in programming language such as python, Javascript, Java, node.js, html, CSS, React.js. Built real-world applications and websites with modern tools and frameworks.

Designed, developed and implemented software applications based on analyzed requirements and understanding of industry technical standards.

I prioritize in client design requirements to every detail, work on the app or web scalability, fast and responsive. With a unique theme design and styling for dark/light mode functionality, making intuitive layouts and user friendly as well.

Provides technical direction and system architecture expertise.
